**Plug and Play Autonomous Trailer/Container/Railcar (Un)loading**

**Details:**  
**Creating next gen (un)loading robots**

Navflex Pallet Truck

MVP READY

Counterbalanced

In Development

**UVP:**

- No infrastructure modifications and deployed in hours, not weeks
- Operates safely in natural uncontrolled environments
- Self-contained system, can work independently or integrated with WMS/FMS

**Use cases:**

- (Un)loading trailers docked at gates with palletized goods.
- The loads can be picked up from floor, racks or rollertracks.
- Adaptable to different cargo sizes/types, space requirements, and loading patterns

**Looking for:**

Customers X Investors X

Customers: we are looking to learn about your case and start a pilot

Investors: Seed to finish our product portfolio & serve customers
